ABSTRACT

Cook, R.C. and S.R. Heizer, 1978. Basic data for the 1976 Canadian chinook and coho catch sampling and mark recovery program. Volume Two: Observed and estimated mark recoveries for each tag code. Fish. Mar. Serv. Data Rep. 58: 629 pp.

The Canadian Mark Recovery Program was initiated in 1974 to provide observed and estimated mark recoveries of chinook salmon (Oncorhynchus tshawytscha) and coho salmon (O. kisutch) in various British Columbia commercial and sport fisheries in tidal waters. This is the second volume of a four part report on chinook and coho mark recoveries in 1976 fisheries. Virtually all marks recovered in 1976 were adipose-fin-clips contained coded-wire-tags. Observed and estimated mark recoveries are presented for each tag code on either a weekly or bi-weekly basis.

Key Words: Ocean fisheries, British Columbia, mark sampling, fin clips, coded-wire-tags, chinook salmon, coho salmon.

RÉSUMÉ

Cook, R.C. and S.R. Heizer, 1978. Basic data for the 1976 Canadian chinook and coho catch sampling and mark recovery program. Volume Two: Observed and estimated mark recoveries for each tag code. Fish. Mar. Serv. Data Rep. 58: 629 pp.

Le Programme canadien de récupération des marques a été mis sur pied en 1974 pour observer et estimer la récupération des marques des saumons chinook (Oncorhynchus tshawytscha) et coho (O. kisutch) dans diverses zones de pêche commerciale et sportive des eaux à marée de le Colombie-Britannique. Nous présentons le deuxième des quatre volumes de l'année 1976. Presque toutes les marques récupérées en 1976 étaient fixées à la nageoire adipeuse et portaient une étiquette métallique codée. La récupération estimative et observée des marques est donnée pour chaque code d'étiquette, pour des periodes d'une ou de deux semaines.

Mots-clés: pêche oceanique; Colombie-Britannique; échantillonnage par marquage; marques fixées aux nageoires; étiquettes métalliques codées; saumon chinook; saumon coho.

Vol. 2 de 4

INTRODUCTION

In 1976 The Canadian Chinook and Coho Catch Sampling and Mark Recovery Program (hereafter referred to as the Mark Recovery Program or MRP) completed its third year of sampling all major British Columbia fisheries (net, troll and sport). Commercial fisheries were sampled randomly with a target intensity of 20%, while sport sampling was based, as it was in the past, on voluntary returns. A previous report describes the MRP in detail (Argue, 1976). Heizer and Beukema (1977 MS) and Heizer, Cook and Argue (1978 MS) present results from the 1974 and 1975 sampling seasons.

This is the second volume of a report of mark recovery data gathered in 1976. The full report includes the following subreports:

Volume 1

Subreport 1 - Catch, Sample Numbers and Computed Ratios, 1976 (lists weekly summaries for commercial Catch Regions);

Subreport 2 - Observed and Estimated Recoveries of Marked Salmon in Sampled Canadian Commercial and Sport Fisheries, 1976 (gives summaries by Catch Region, mark and time period);

Subreport 3 - Georgia Strait Sport Catch and Sport Total Recoveries of Marked Salmon, 1976 (gives monthly catch & mark totals);

Volume 2

Subreport 4 - Observed and Estimated Recoveries of Marked Salmon in Sampled Canadian Commercial and Sport Fisheries, 1976 (gives summaries by mark, Catch Region and time period);

Volume 3

Subreport 5 - Canadian Recoveries of Chinook with Coded Wire Tags (lists individual mark recoveries);

Subreport 6 - Canadian Recoveries of Chinook with Fin Marks (lists individual multiple fin mark recoveries);

Volume 4

Subreport 7 - Canadian Recoveries of Coho with Coded Wire Tags (lists individual mark recoveries).

Included herein is subreport 4 providing observed and estimated mark recoveries for each mark code.

ORGANIZATION AND CONTENT OF SUBREPORTS

Definitions

In this report, the word "tag" will be used for a fish identification code (e.g., binary code: agency 2, data 8/6, or multiple fin mark: dorsal-left ventral). A "mark" means a fish with clipped fins or missing adipose fin.

Most marks recovered from commercial fisheries were obtained from random samples of catches; these marks are "random marks" or "random recoveries". Other recoveries do not fulfill the condition of random-ness, i.e., voluntary sport returns and selected recoveries from the commercial catch. In all cases, estimates of numbers of marks are based on observed random recoveries.

Subreport 4: Observed and Estimated Recoveries of Marked Salmon . . .

Contained in this subreport are observed and estimated numbers of marked chinook and coho in the randomly sampled commercial fisheries, and observed (voluntary) recoveries from sport fisheries. Estimated numbers were obtained by multiplying the weekly numbers of random recoveries by the C/S ratios from subreport 1. The weekly periods are those used in reporting British Columbia Catch Statistics (Newton, 1977). Table 1 shows the dates of these weeks for 1976 and the corresponding abbreviated ending dates used.

Observed and estimated recoveries are listed by Catch Region for each tag code. In comparison, subreport 2 in Volume 1 lists observed and estimated recoveries by tag code for each Catch Region. A Catch Region is defined in terms of a gear type operating in specific Statistical Areas. Table 2 gives these Catch Regions, their mnemonics, and the Statistical Areas comprising them as used in this report. Catch Regions in this subreport appear in the order listed in Table 2. The Statistical Areas may be identified on Figures 1 and 2.

The order in which marks are presented is as follows. First are "Unknown Species" which are marks for which no species were reported, and could not be assigned a species on the basis of any other information collected (note that these are all voluntary returns from the sport fishery).[3]

---

[3] For the Georgia Strait sport fishery, the vast majority of unknown species (particularly the "problem tag" categories) resulted because labels attached by the sport fishermen to heads from adipose-clipped chinook and coho salmon did not request that the sport fishermen record species.

Chinook with multiple fin marks are reported next, ordered as in Table 3. Chinook with binary tags are followed by chinook with colour tags (see Table 4 for interpretations of colour abbreviations) followed in turn by chinook with prototype tags. These are followed by the "problem tag" categories of "PIN LOST", "NO PIN" and "NO DATA". The above sequence of mark types is then followed in the same sequence for coho.

It should be noted that when the headings for each tag are incomplete, that is to say, the release data is not printed, this constitutes a flag indicating a difference between the species of a tag at release and the reported species of the recovered tag, or a reading of an unregistered code, or a tag partly or entirely unreadable. Release information was taken from the coded wire tag usage lists (Anon., 1974, 1975, 1976, 1977) and from three Washington Department of Fisheries Mark Recovery Reports (Anon., 1975a; 1976a; 1977a; 1978). In all cases, the most current information from thse reports was considered the most accurate.

For multiple fin marks, no attempt has been made to incorporate release information or to assign the fish to a releasing agency. The multiple fin mark, scale age (European nomenclature augmented by 7.0 indicating a missing scale, 8.0 indicating a regenerate scale and 9.0 indicating an unreadable scale) and species appear in the headings. Scale age 0.0 indicates that no scale was taken.

Recoveries from net Catch Regions are reported "WEEKLY". These periods are the Statistical Weeks shown in Table 1. The numbers of estimated recoveries in a "BIWEEKLY" period - for troll Catch Regions - is the sum of estimates from two consecutive Statistical Weeks, the latter week ending on the date shown. Observed sport recoveries are also reported "BIWEEKLY".

Estimates of recoveries from time periods or from Catch Regions either without a reported catch (e.g. mixed Catch Regions) or not sampled are not made since C/S ratios for these cases cannot be computed.

For each mark, there are totals of observed and estimated recoveries for each Catch Region, and grand totals for all Catch Regions in which the mark was recovered. There are also cumulative totals for each mark type to be found at the end of the fin mark section, coded wire tag section, and "problem tag" sections.

ACKNOWLEDGEMENTS

Many people worked hard and long to collect this information. We would like to thank all the samplers and the lab and office support staff for their excellent and dedicated work.

The Mark Recovery Program would especially like to thank all members of the EDP staff for their work in processing the MRP data.

MY 29	May 23 - May 29	054
JN 5	May 30 - Jun 5	061
JN 12	Jun 6 - Jun 12	062
JN 19	Jun 13 - Jun 19	063
JN 26	Jun 20 - Jun 26	064
JL 3	Jun 27 - Jul 3	071
JL 10	Jul 4 - Jul 10	072
JL 17	Jul 11 - Jul 17	073
JL 24	Jul 18 - Jul 24	074
JL 31	Jul 25 - Jul 31	075
AU 7	Aug 1 - Aug 7	081
AU 14	Aug 8 - Aug 14	082
AU 21	Aug 15 - Aug 21	083
AU 28	Aug 22 - Aug 28	084
SP 4	Aug 29 - Sep 4	091
SP 11	Sep 5 - Sep 11	092
SP 18	Sep 12 - Sep 18	093
SP 25	Sep 19 - Sep 25	094
OC 2	Sep 26 - Oct 2	101
OC 9	Oct 3 - Oct 9	102
OC 16	Oct 10 - Oct 16	103
OC 23	Oct 17 - Oct 23	104
OC 30	Oct 24 - Oct 30	105
NO 6	Oct 31 - Nov 6	111
NO 13	Nov 7 - Nov 13	112
NO 20	Nov 14 - Nov 20	113
NO 27	Nov 21 - Nov 27	114
DE 25*	Nov 28 - Dec 25	120
DE 31*	Dec 26 - Dec 31	125

* Since fishing activity is sharply reduced in winter months, the "Statistical Weeks" used in reporting catch statistics are up to 4 weeks long.

Table 2. Names and Statistical Areas comprising Catch Regions. Note that all regions are commercial Catch Regions except those specified as sport.

Mnemonic	Full Name	Statistical Areas Included
ATR	Alaska Troll	N.A.
NTR	Northern Troll	1-5
CTR	Central Troll	6-12, 30
NWTR	Northwest Troll	25-27
SWTR	Southwest Troll	23 & 24
WOTR	Washington-Oregon Troll	21 & C
JFTR	Juan de Fuca Troll	20
GSTR	Georgia Strait Troll	13-18, 29A, B & C
NN	Northern Net*	1-5
CN	Central Net	6-11
NWVN	Northwest Vancouver I. Net	25-27
SWVN	Southwest Vancouver I. Net	21-24
JFN	Juan de Fuca Net	20
JSN	Johnstone Strait Net	12-13
GSN	Georgia Strait Net	14-18
FGN	Fraser River Gill Net	29A, B, C, D & E
NSPT	Northern Sport	1-5
CSPT	Central Sport	6-12
WSPT	West Coast Vancouver I. Sport	21-27
GSPT	Georgia Strait Sport	13-20, 28, 29A, B & C

* In this table, "Net" indicated mixed gillnet and seine fisheries.

Table 3. Order of sorting of fin marks, 1976.

Fin Mark Number	Fin Mark
001	AD (not included in fin mark list)
002	AD/D
004	AD/D/RM
007	AD/LV
008	AD/LV/RV
010	AD/RV
011	AD/LP
012	AD/RP
014	AD/RM
016	D/LV
017	D/LV/RV
018	D/RV
019	D/LP
020	D/RP
023	AD/LM/RM
025	AD/D/RP
028	AD/LV/LM
029	AD/RV/RM
030	AD/RP/LV
032	AD/RP/LM
034	AD/D/RP/LM
035	AD/D/RV/LM
036	AD/LV/RM

Table 4. CWT Colour Codes (in sorted order).

Mnemonic	Colour
NA	Not available (missing or unreadable)
BL	Blue
BR	Brown
GN	Green
GY	Grey
LB	Light Blue
LG	Light Green
OR	Orange
XB	Oxide Blue
XR	Oxide Red
XY	Oxide Yellow
PK	Pink
PU	Purple
RD	Red
WH	White
YW	Yellow
DG	Dark Green
BK	Black
GD	Gold
CY	Chrome Yellow
MG	Medium Green
TN	Tan
DR	Dark Red
MO	Medium Orange
GM	Metallic Grey
MX	Mixed
